
YAQEEN
ENGINEERING LIMITED

COMPANY PROFILE

COMPANY OVERVIEW

Yaqeen Engineering Limited, as its name suggest, is a consultancy firm specializes in engineering, architecture, building safety assessment and Construction. Our areas of expertise include structural & architectural design, material testing, construction of new building (both residential and industrial), estimating, cost control, CPM Scheduling, expert witness and performing essential retrofitting work for existing old or defective building.

We believe in taking a responsible and holistic approach to everything we do, and strive to promote sustainable development and good practice standards. We believe in a business behavior based on trust, integrity, transparency and professionalism.

OUR VISION

Our vision is to be the leading firm of designers, planners, engineers, consultants & technical specialists offering a broad range of professional services. Through our work, we make a positive difference in the country by generating value for our clients, our people and the community.

Our consistent delivery makes us the partner of choice for country leading organizations designing, building, construction, testing and refurbishing or fitting out their spaces or real estate.

MESSAGE FROM MANAGING DIRECTOR

Md. Tareque Adnan

Member, IEB M-38588

Managing Director
& Lead Structural Engineer,
Yaqeen Engineering Limited.

As the Managing Director of Yaqeen Engineering Limited (YEL), I would like to extend my best wishes to everyone. Since the beginning of my civil engineering career, I have been working on building safety & compliance issues. I have spent two significant years of my career as a structural safety engineer at the Accord on Fire & Building Safety in Bangladesh.

The first & foremost important factor in building construction is proper architectural & structural design. From my past work experience, I have witnessed many cases where buildings are constructed without following the BNBC. Proper consideration of seismic and wind load in a structural design during building construction is a must. In addition, proper seismic detailing should also be under consideration.

Many of us are quite indifferent about construction work. To achieve desired strength, the mixing ratio has to be fixed by selecting proper construction materials prior to construction. In such cases, relevent material test reports must be preserved. YEL continues its work properly in the field of structural design & construction & is committed to do so.

Apart from new building construction we also conduct retrofittng in existing buildings. Furthermore, YEL also deals with electrical and fire safety issues. YEL Designs single line diagrams and lightning protection systems by maintaining appropriate codes on electrical safety issues. Similarly, fire safety systems are designed by following appropriate codes on fire safety issues.

In our society, lack of commitment in schedule is seen in most of the construction works. YEL is walking against the flow and ensures proper commitment and always comes with accurate safety and construction costs and will continue to do so in the future, InshaAllah. I wish everyone's sincere cooperation and blessings in this regard.

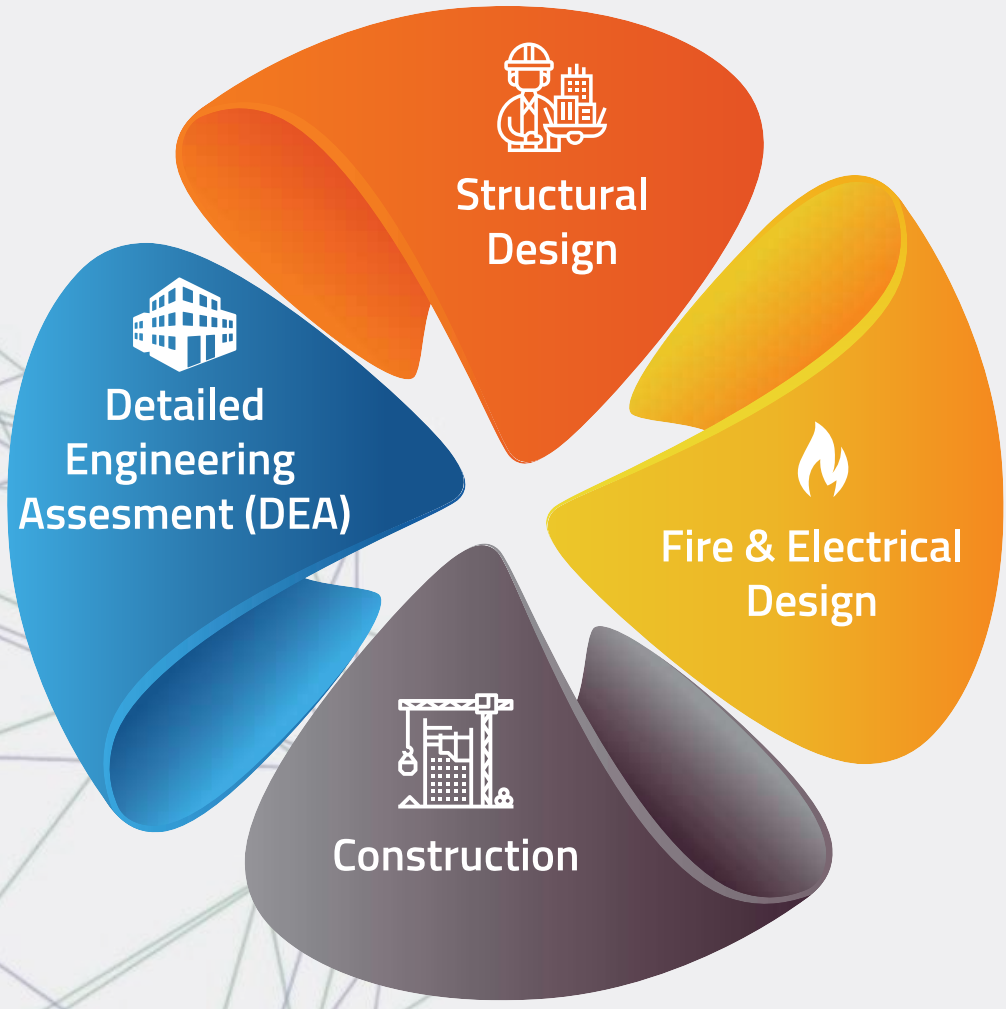
OUR SERVICES INCLUDE



SERVICES IN DETAILS

Service offered in Civil Sector

Initial and Details Structural Integrity Safety Assessment to meet the ILO, Accord/RSC & Nirapon requirement according to BNBC & BS standard.
Building Structural Health Check.
New Structural & Architectural Design for Residential, Industrial & Commercial Buildings
Structural Design & Review
Architectural Design & Review.
Interior Design & As-Built Drawing.
Structural and Architectural Drawing for New Building.
Foundation Design and Analysis.
Retrofitting Design & Implementation.
Construction of New Buildings.

Service Offered in Electrical Sector

Initial and Details Electrical Safety Assessment to meet ILO, Accord/RSC & Nirapon requirement according to BNBC & BS standard.
Design Electrical Single Line Diagram (SLD), Electrical System Layout Diagram, Earthing Layout Diagram for as-built and new construction building according to Accord/RSC & Nirapon Standard.
Design of Lightening Protection System (LPS) according to BNBC Standard.
Floor Layout Plan of Electrical System.

Service offered in Fire Sector

Initial and Details Fire Safety Assessment to meet the ILO, Accord/RSC & Nirapon requirement according to BNBC & BS standard.
Fire Layout Plan.
Design & Drawing of Fire Detec□on System and Fire Protection System (Hydrant & Sprinkler system)
with Hydraulic Calculation.
Supply Equipments for Fire Detection & Protection System (TYCO, SFFECO, BRISTOL, NAFFCO, COOPER and others.
a) Different types of Sprinkler for different temperature.
b) Fully automatic Fire Pump System.
c) Fire rated door
d) Air sampling smoke detection system
e) Alarm system
f) Foam System
g) Gas Suppression System
h) Grooved Piping System
Installation, Comm issioning and Testing of Fire Detection & Protection System According Guideline of Nirapon, Accord/RSC & ILO.
Modification, Renovation and Replace of Existing Equipments By New Ones

Supply Equipment in Fire Sector

a) Fire Alarm control Panel (FACP)
b) Repeater Panel
c) Photoelectric Smoke Sensor
d) Heat Sensor
e) Multi-Criteria Sensor
f) Beam Detector
g) Duct Detector
h) Flame Detector

Services Offered In Geotech Sector

Subsoil Investigation
Static Load Test
Dynamic Load Test
Pull Out Load Test
Lateral Load Test
Pile Integrity Test
Crosshole Sonic Logging Test
Parallel Seismic Instrument Test
Crosshole Seismic (PSLog) Test

Services Offered In Material Tests

Concrete Strength Evaluation
Schmidt Rebound Hammer Test
Ultrasonic Pulse Velocity Analysis
Ferroscan
Carbonation Test
Concrete Crack Depth Check
Core Cutting
Sieve Analysis/ Gradation
Fine content Analysis
Aggregate Crushing Value(ACV) Test
Elongation Index (El)/ Shape Test
Flakiness Index (Fl)
Unit Weight of Aggregate (CA & FA)
Dry Rodded Unit Weight (CA)
Moisture Content of aggregate
Specific Gravity/ Density Test
Concrete Mix design
Slump test
Unit weight of fresh concrete
Setting time of concrete
Air content test

MEZZANINE SYSTEM (MS+M)

WHY CHOOSE PRE-ENGINEERED STEEL BUILDINGS

COST SAVINGS

Price per square meter can be 25% lower than conentional steel buildings. Site erection cost is low because of faster erection times and easier erection process

CONSTRUCTION TIME

PEB reduces the total construction time by at least 40% which leads to faster occupancy and early revenue.

QUALITY CONTROL

Designed and fabricated in-hose with strict quality control. The fabrication process includes design and engineering, as well as detailing and manufacturing at the factory

LARGE CLEAR SPAN

In PEB the buildings can be given up to 90m clear spans which is the important advantage of PEB with free column space.

ARCHITECTURAL VERSILITY

Building can be supplied with various types of fascia's, canopies, and curved eaves and are designed to recieve pre-cast concrete wall panels, curtain walls, block walls and other wall systems

SEISMIC RESISTANCE

The super structure made of steel is light in weight and flexible enough to offer greater resistance to seismic waves when compared to conventional concrete structures.

QUICK ERECTION

All steel components are fabricated at factory and are linked by bols at site. So the erection process is fast, step by step, easy to install and require simple equipment

LOW MAINTENACE

PEBs have high quality paint systems for cladding which gives long durability and low maintenance costs.

FLEXIBILITY

Pre-engineered steel buildings are flexible in any requirement of design, easy to expand in the future and also economically with low transportation cost.

ENERGY EFFICIENCY

Nowadays PEB are the green solution for the environment with CO2 reduction, energy efficiency and recyclability

SINGLE SOURCE AVAILABILITY

As the complete building package is supplied by a single vendor, compatibility of all building components and accessories is assured. This is one of the major benifits of the PEB systems.

WORKING STEPS

NEED ANALYSIS

- Determine client's requirements (floor plan, working flow diagrams necessary clear heights etc.)
- Collect Digital Survey Report & Soil Parameters
- Collect Specifications for Wind and Seismic Analysis

PROPOSAL DESIGN

- Structural design based on nedd analysis
- Estimates of materials and prepare BOQ
- Setting rates for quotation

NEGOTIATIONS

- Finalizing proposal based on approved drawings
- Finalizing agreements
- Obtaining initial payment

FABRICATION STAGE

- Awaiting for basic civil work completion Setting anchor bolts
- Confirmation of final anchor bolt measurements
- Complete fabrication drawing
- Fabrication & delivery of columns, beams rafters, purlins, nut-bolts etc

ERECTION STAGE 01

- Setting up columns
- Setting up initial column connected beams/rafters
- Setting up 20% of purlin on initial rafters
- Finalizing building alignment

ERECTION STAGE 2

- Finalizing full steeing of purlins
- Decking sheet setting
- Roof insulation setting
- Roof sheeting & Skylight fitting

ERECTION STAGE 3

- Setting up of side purlins & side sheeting
- Fitting ridge ventilation
- Fitting natural air ventilator or power vent

FINISHING STAGE

- Awaiting civil work completion Setting up rain gutter and down pipe
- for drainage
- Checking & testing of sheets
- Setting up doors and canopies

PROJECT HANDOVER

- Opening ceremony
- Feedback from clients
